# One Standard,

# Improved Compatibility.

## The Navy Marine Corps Intranet (NMCI)

### Mission

To enable the sharing of information worldwide with those who need it, when they need it, and to enhance enterprise-wide work, training, and quality of life for every Marine, Sailor, and DON Civilian.

### Why the NMCI?

Our Business Process Reengineering team has moved toward a Seat Management concept since our efforts began. Current Seat Management initiatives with the NASA ODIN contract vehicle have been suspended since NMCI will satisfy our Seat Management recommendations. Due to the strong commitment of NAVAIR to participate in the NMCI contract, our efforts will go toward making NMCI a success. NMCI is right for the Navy and right for NAVAIR.

It is important that all NAVAIR customers understand Seat Management strategies and what it will mean to the organization. Listed below are some common questions about NMCI and Seat Management. We thank you for your interest in NMCI and are committed to providing you with the latest news and information about this exciting new concept in information management.

### What is NMCI?

NMCI is intended to develop a long-term arrangement with the commercial sector which transfers the responsibility and risk for providing and managing the vast majority of Department of the Navy (DON) information technology infrastructure - networks, desktop computers and related services.

This DON enterprise-wide network capability merges the Navy and Marine Corps networks to provide end-to-end secure access to the full range of voice, video and data services for 400,000 plus people at Navy and Marine Corps bases.

### NMCI Benefits

- Improves business and warfighting interoperability
- Enhances security
- Leverages purchasing power
- Allows for rapid response to technology development
- Integrates operations and maintenance, asset management and training
- Employs proven best practices by industry

### NMCI Objectives

- Provides information technology services that will enable information superiority and connectivity throughout the DON
- Reduces the cost of voice, video, and data services across the enterprise
- Improves information security
- Provides interoperability with joint and allied forces
- Increases the speed and quality of decision making

### What Will NMCI Mean for Me?

- Improves customer satisfaction through continuous monitoring, rapid resolution of incidents, and technology refreshment
- Facilitates a reliable modern computing environment, which allows the workforce to focus on the mission

### What is the Difference Between the Seat Management BPR and NMCI?

The NMCI extends across the entire Navy and Marine Corps. NAVAIR's Seat Management initiative was only focused on NAVAIR and evaluated existing Seat Management vendors and contract vehicles to obtain these services. With Navy-wide direction, NAVAIR will now execute our seat management strategy via NMCI.

## NMCI Is Right For The Navy And Right For NAVAIR

# NAVAIR Senior Steering Group (SSG) Approved Recommendations For the IT BPR Team

## **Adopt Seat Management for desktop resources**

**Status:** Suspended and directed to pursue services under NMCI contract

## **Establish a separate NAVAIR CIO**

**Status:** Organizational location and scope of responsibilities are being worked now

## **Consolidate circuits**

**Status:** 57 circuits consolidated onto NAVWAN

### **Can you clarify NMCI benefits?**

NMCI is unlike any other effort towards interoperability in that all of our desktops and the network that supports these desktops will be managed by a single source. NMCI will identify IT expenditures on a per seat basis, which has never been accomplished before. The TEAM will be able to more accurately track IT dollars and realize cost savings by purchasing resources through the NMCI contract.

The TEAM will know exactly what IT costs on a monthly basis and will be able to buy the IT resources for as long as they need them. The addition of a TEAM Help Desk opened 24 hours a day/ 7 days a week will also serve as a major benefit for the TEAM.

### **What will happen to IT personnel, including embedded analysts?**

While NMCI will inevitably restructure our organization, NAVAIR will rely on and make every effort to retain personnel and the IT knowledge that is key to NAVAIR's success and future. The workplace is changing, however, and some shifts are bound to occur. We will continue to make every effort to communicate the latest news on NMCI as it occurs.

### **How does NMCI relate to the TEAM's view of IT Management?**

NMCI is a very clear example of fulfilling NAVAIR's vision of "One TEAM supporting the warfighter." A standard configuration for all NAVAIR sites will without doubt increase interoperability and have a major effect in shaping the NAVAIR team into a cohesive, streamlined presence that will better serve our ultimate customer - the warfighter.

Moving toward a Navy standard, not just a NAVAIR standard, will support interoperability with our customers and partners.

### **Will customers be able to buy varying levels of service?**

Levels of service will be specified upon the award of an NMCI contract, but it is likely that the NMCI contract will include various levels of service to reflect customer requirements.

### **What will the refreshment cycle be?**

The refreshment cycle for the NMCI contract is currently under consideration. Early indications suggest that a three-year refreshment cycle might provide the best value, but the exact length of the cycle will not be determined until the contract is awarded. It can be definitively stated, however, that NMCI will provide a regular refreshment cycle that will greatly enhance the technological capabilities of the TEAM.
